SOWNDARYA M

Tenkasi, Tamil Nadu, India | sowndaryam23it@psnacet.edu.in | Ph: 7200281857

Career Objective

Analytical and detail-oriented Data Analyst with strong expertise in Python, SQL, Java, and data visualization. Passionate about building intelligent digital solutions that combine analytics, automation, and explainable AI. Seeking' opportunities to contribute to organizational growth by transforming raw data into actionable insights.

Education

• **PSNA COLLEGE OF ENGINEERING AND TECHNOLOGY**, Dindigul	2023 – 2027	CGPA: 8.4
• **Higher Secondary (XII)**, Tmt.Manjammal govt girls hr sc school, Tenkasi	2023	83.5%
• **Secondary (X)**, Tmt.Manjammal govt girls hr sc school, Tenkasi	2021	85%

Hard Skills

- Programming Languages: Python, SQL, Java
- Data Analysis & Visualization: Power BI, MS Excel
- Databases: MongoDB, PostgreSQL

Soft Skills

- Problem-Solving
- Teamwork
- Communication
- Adaptability
- Time Management

Projects

- **Smart Mother–Child Health Monitoring System**
  - Developed a health platform using wearable tech to track maternal and child health, assign unique IDs, and automate reminders.
  - The system captures real-time vitals like heart rate, temperature, and steps, stores health records securely, and provides health tips and appointment tracking.
  - It ensures proactive health monitoring and timely alerts for mothers and caregivers.
- **Fake Skill Detection in Resumes (Major Project)**
  - Built an NLP-based system to detect fake or exaggerated skills in resumes and generate authenticity scores for recruiters.
  - The system parses resumes, extracts skills, verifies them against trusted sources, and provides a recruiter dashboard to make informed hiring decisions.
  - It reduces hiring risks, shortlists genuine candidates, and improves recruitment efficiency.
  - **Tech Stack**: Python, spaCy, FastAPI, MongoDB, React.js, Visual Studio Code, GitHub
- **App Review Sentiment Analysis (Mini Project)**
  - Developed a web app that analyzes app reviews and classifies sentiments as Positive, Negative, or Neutral using deep learning.
  - The app supports review input and CSV upload, performs sentiment prediction, and provides insights through dashboards with pie charts, trend analysis, and top keywords.
  - It helps businesses understand user opinions and improve app quality based on feedback.
  - **Tech Stack**: Python, HTML, CSS, JavaScript, FastAPI, TensorFlow, Keras, LSTM, Pandas, NumPy, Scikit-learn, Swagger UI, VS Code, Uvicorn, CSV Files, Git & GitHub
- **Customer Behavior Dashboard (Mini Project)**
  - Created a Power BI dashboard to analyze customer demographics, purchase behavior, and sales trends.
  - The dashboard includes KPIs, demographic analysis, product-wise sales, trend charts, and interactive filters to explore key business insights.
  - It enables data-driven decision-making and helps identify growth opportunities.
  - **Tech Stack**: SQL, Python, Power BI
